November

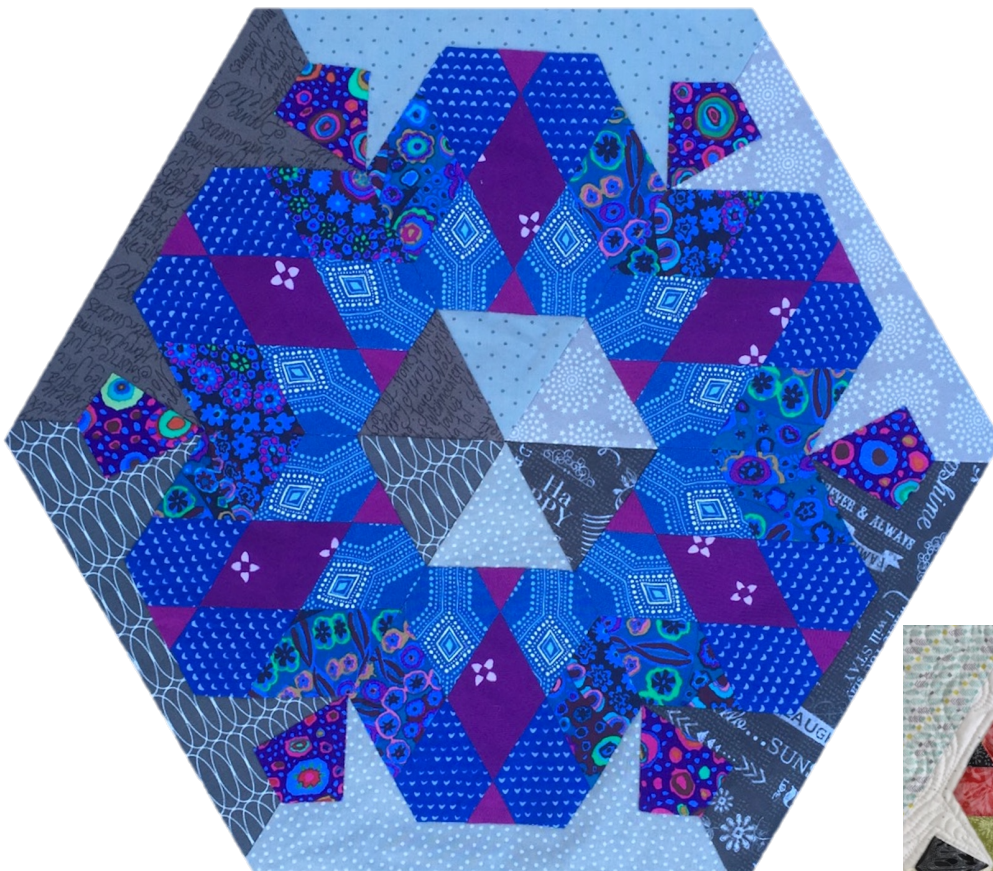

Uses 6 of the November 25th block

Plus 6 - 2 1/2" Kites

A kite shape is one third of an equilateral triangle. If you were to put 3 together aligning the short edges you would end up with an equilateral triangle. Put 6 together along the long edges and you have a hexagon. The size is named for the size of hexagon it would make when pieced.

A 2 1/2" kite measures:

1 1/4" x 1 1/4" x 2 3/16" x 2 3/16"

Follow the instructions in
'General Piecing for
Perpetually Hexie' to sew
the background triangles
together in preparation for
appliquing the hexie
wreath plus the extra
shapes.
