This full-color image will allow you to zoom in on the PDF and get a better look at my fabric placement, particularly in the reversed/reflect ed blocks.

It would be difficult to get perfect reflections unless we start with fabrics that contain mirror images; so we fool the eye by using fabrics of varying value and prints to create what we see as a reflection. Reflections can be a subtle thing depending on light and angle of view.

When viewing a reflection in water the waves often disturb the image. Reflecting on moments in our lives is a subjective view, dependent on your state of mind at the time. Take time for reflection!
